MOTION

WE MOVE that, beginning immediately, for all applicable ordinances, reports, memorandum, or other documents referred to City Council from the Administration that reference a physical Cincinnati address, property, or development, the Administration specifically indicate in which Cincinnati neighborhood the property is located.

Councilmember Yvette Simpson

Statement

City Council often considers legislation, including but not limited to zoning changes, tax abatements, and new property developments, which have a considerable impact on the surrounding community. Clearly indicating in which neighborhood the affected property is located will provide better public notice of actions impacting communities.
