MOTION

September 12, 2016

We MOVE that at the expiration of the Cincinnati Recreation Commission's current gas-powered golf cart lease, the City Administration transitions to electric golf carts for all municipal golf courses.

Councilmember Chris Seelbach

PG Sittenball

STATEMENT

Following the lead of Chicago, IL, Lexington, KY, Louisville, KY, Columbus, OH, Indianapolis, IN, Houston, TX, Columbus, NE, St. Petersburg, FL, and all cities in the state of California, we believe it is time for Cincinnati to do our part to clean up and quiet down our golf courses by moving to electric powered carts instead of gas carts. This decade's long trend towards electric carts has meant that electric cart technology is vastly improved and prices are now generally comparable to gas cart prices.
