## MOTION

We move that the Administration report to Council on the number of homes identified for demolition that have since been brought up to standard, and that the Administration propose a plan to prevent owners of habitable homes from receiving notices of demolition in the future.

## STATEMENT

A constituent recently contacted our office to ask for assistance preventing the City from demolishing his home. He and his wife purchased the newly renovated home in Northside in August 2015, and on November 8, 2016 received two certified letters from the City's Buildings and Inspections Department stating that the homes had been condemned and identified for demolition at the owners' expense.
